DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 – 3, 5, 7, 8, 9 and 10, drawn to a collagen material.

Group II, claim(s) 11 – 21, 27 and optionally 28, drawn to a production process of a collagen material.

Group III, claim(s) 22 – 26 and optionally 28, drawn to a production process of a collagen material.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I, II and III do not have a common special technical feature. Group I relates to a non-woven collagen material, Groups II relates to a method of manufacturing involving freeze-drying and Group III relates to a method of manufacturing involving air-drying. The features of the material of Group I does not imply the use of a freeze-drying or air-drying manufacturing method. Additionally, the special technical features of Groups II and III are different. Hence, there is no unity of invention and lack of unity is held by the Examiner.
